A lover of all things tech. After many late nights and gallons of coffee I have two years of full-time self funded studying behind me. I'm now ready and eager to continue my journey within a skilled team I can contribute towards and grow with.

Work experience

Full stack web developer Self Employed London

Since June 2020

- Landed my first client for whom I am building an Ecommerce site using React, ApolloClient and styled-components for the front-end, Express, GraphQl & MongoDB for the back-end.
- Building projects from the ground up with experience integrating popular API's including Stripe & Google Maps
- Created server side rendered Ecommerce site using Express, RESTful end-points & GraphQl to handle requests, EJS to serve HTML, connect-mongodb-session & multer-s3 to handle image uploads to an AWS S3 bucket.
- Creating an analytics tool using Redux & ducks for state management (WIP)
- Python project using pandas data-analysis library to convert excel spreadsheets to searchable columns and rows displayed by Tkinter GUI library.
- Multiple live demos.

Please find the full details on my portfolio @ https://karlwarner.dev
